To create a stunning presentation, it's best to simplify your thoughts. Start with an outline of topics and identify highlights, which can be applied to whatever subject you plan on discussing. You can then organize them into your introduction, your main content, and your conclusion. Make sure you do enough research to support your points. It's also a good idea to pair data with visual aids like charts, graphs, or images.

Remember to keep your presentation easy-to-read.
